

Past Midterm and Examination Questions

Several students have requested past midterm and exam questions to better understand what a test of exam question may look like. Below are some past test and exam questions.

Disclaimer:

Please note that these are from **past** semesters and as such, many of these concepts may not have been covered in your semester as the course is updated and changed every semester. It is for this reason, that I have not historically provided test question. These questions, however, are provided for reference only and in response to student requests. Kindly **refrain** from emailing or using office hours for clarification of these past questions (on past content). The focus of office hours and emails must be on current content. You are of course welcome to discuss any concepts from your own lectures or the current version of the textbook. Sample multiple choice questions are provided in Wiley Plus online content. Some students may find these questions distracting. Feel free to completely disregard these questions if you feel they may cause confusion.

Sample Questions

- Robinhood has received a great deal of media attention for halting the trade of Gamestop shares. Argue why it may have been UNETHICAL to do this. Only provide arguments for why it may have been UNETHICAL.
- What is the purpose of a teamwork contract and why is it necessary? In your answer, identify a common teamwork issue and two ways the contract helps to avoid or address the issue, tying your answer to effective teamwork solutions learned in class.
- Describe the difference between efficiency and effectiveness.
- What asset does the Cirque du Soleil ascribe the most value to?
- List three (3) strategies utilized by the Cirque du Soleil that has led to their continued success.
- The average German worker enjoys approximately 30 paid vacation days each year, while the average American employee is provided with just 10.2 days annually. What effect, or effects, would you expect these practices to have on relative worker productivity between Germany and the United States?
- You are on an elevator that will reach the floor you need to go to, in less than one minute. Your young friend, who is on the elevator with you, asks you to explain how interest rates set by Central Banks contribute to stimulating - or slowing down - a national economy. You need to explain before you reach your floor. Okay, start.
- Identify one (1) of the reasons why it is important for governments to attempt to keep inflation at low levels.
- List 10 essential elements of a partnership agreement.
- List, in order, the 4 steps in the financial planning process.
- In the video: Toying With Success - McFarlane Toys, it was evident that McFarlane tries to avoid having other investors involved in his business. What was the reason for this?

- List and describe three (3) of the four (4) types of insurance discussed in class.
- The Walt Disney Company has been very successful in marketing their many product and service lines. List the 4 "P's" of marketing and describe how the Walt Disney Company has applied them to their resort hotels in Orlando, Florida as discussed in class.
- Consider two (2) companies: Shockwaves Electrical Inc. manufactures a single model of DVD player, and Breads Without Borders Ltd. is a large bakery which makes and sells a variety of baked goods, including cookies, muffins, cakes and various kinds of breads. For each company, what is the most likely form of operations process used in their production? Why?
- What risks are there of customer backlash when advertising social responsibility? Provide an example.
- Explain how the T. Eaton Company changed their strategy in light of these steps.
- Canada recently legalized cannabis. Provide the arguments for and against whether this is ethical or not.
- Tesla has been unusually successful despite being a relatively new company. Reflecting on our in-class discussion:
- A common analysis performed by managers is the SWOT analysis. List the four (4) key components of a SWOT analysis. Provide an example of each.
- List 4 disadvantages of operating as a corporation.
- What do you think caused Tesla to surpass GM and Ford at one point despite sustained losses?
- What do you think Tesla needs to increase and sustain profitability?
- Why would Tesla take such significant risk?
- What are Tesla's key threats?
